

## AC-2030A Day Binoculars

The AC-2030A Daytime Binoculars are built from only the most exceptional quality glass to deliver a crisp and clear image. The glass features a special proprietary lens coating used in night vision technology to maximize light transmission for better performance in low light environments. The binoculars are built tough to withstand the harshest environmental conditions, including marine environments. Each binocular is completely sealed against dust, sand, and water and feature military reticle. It meets the latest military standards. Light and compact, these binoculars stand in line with the most modern warfare

equipment.
