

Ghost Hunter Night Vision Goggles

The Ghost Hunter Night Vision Goggles is a dual tube system that offers a more comfortable viewing system that is easier on the eyes and provides more details than a single tube system. The device is equipped with a flip-up head mount for comfortable, long-lasting, hands-free operation.

The Ghost Hunter is also equipped with a powerful infrared illuminator providing a bright, clear image in low-ambient light conditions or total darkness. It has a lightweight, durable polymer construction for increased resilience, and features an automatic shut-off, which turns off the unit when exposed to bright light sources,

ensuring years of operation. The device is protected by a 3-year warranty on tubes and life time on the body.

Features: Compact and lightweight; head mounted; built-in IR illuminator; water resistant; automatic bright light shut off and brightness control; tripod mountable; glass lenses

Standard accessories: Soft carrying case; lens cup; headgear

Optional accessories: Hard carrying/storage case; OTIS lens swabs, lens cleaning kit, optics cleaning system; batteries

Specifications

Magnification	1x
Field of View, °	30
IIT resolution, lp/mm	36
Body material	Glass-filled Nylon Composite
Eye relief, mm	12
Focus range, m	0.3 to infinity
ITT generation	Gen 1
IR illuminator power, mW	75
Objective lens diameter, mm	24
Diopter Adjustment	-5..+5
Operational temperature	-20°C...+40°C
IP rating	IPX3
Battery	Two AAA
Battery Life (with/w/o IR), hours	20/70
Dimensions, mm	136x113x60
Weight, g	380
