

Tenebraux Accessories

by Tenebraux (Anti-Reflection Devices, Flip Covers)

TENEBRAEX Accessories cover a wide range of applications, with anti-reflection devices, flip covers, weapon sight polarizers to fit everything from field binoculars to long range professional telescopes.

ANTI-REFLECTION DEVICES

killFLASH® ARD's use Tenebræx® proprietary XLUME® coating which helps prevent reflection of light from your scope.

killFlash® anti-reflection devices offer "anti-glint" capability as well protection for the glass on your optic from sand, dirt and grime! Installed with flip covers you can extend the life of your investment for many years to come. Our professional products cover a wide range of applications. From field binoculars, spotting scopes, red-dots, long range professional telescopes, and combat optics right down to your trusted hunting scope.

ARDs (Anti-Reflection Devices) use a high-tech honeycomb material and unique geometry to provide a low-cost practical way to hide reflections from optical surfaces.

FLIP COVERS

Tenebraex has designed the world's most trusted flip cover for virtually any optical device.

Tenebraex flip covers provide the ultimate in simple, proven protection for your scope, optic, or camera system. Millions of covers are in active use by the world's most discerning clients, protecting billions of dollars worth of equipment.

Protect your investment with Tenebræx® TT (Tactical Tough)™ Flip Covers. Fully rotating and quick to open. These covers are designed to be used in the harshest environments.
