CADEX Scope Mount Kit

The Cadex Gen 2 unitized scope mounts provide a rock-solid optic mounting solution for precision rifles. These are machined from a solid one-piece aluminum billet for maximum rigidity and perfect alignment between the front and rear rings. The Gen2 models use a 6-screw pattern and are modular so that you can interchange front and rear top rings. A top-quality scope mount is arguably the most important element of a precision rifle package.

- Precise alignment of the front and rear scope bearing surfaces.
- Fit all Mil-Std M1913 rails.
- No twisting of the optical tube assembly and no shifting under heavy recoil.

CADEX Unitized Scope Mount – 34 mm

Fits **Tangent Theta 5-25x56mm** Professional and **Tangent Theta 3-15x50mm** Professional.
