

AGM Front Q-R Adapter for Rattler-C V2 and Secutor LRF-C

- Quick-release system
- Easily convert day scope into a thermal imaging device
- Robust construction

The AGM front quick release adapter allows you to easily attach the Rattler-C V2 or Sector LRF-C thermal imaging clip-on system in front of day scopes to quickly convert a daytime optic into a thermal imaging device without any special tools or equipment required. It ensures perfect alignment and enhances performance, appealing to users seeking optimal functionality in their equipment.

The front quick-release adapter facilitates seamless attachment and detachment, ensuring user convenience and efficiency during field operations, allowing for quick adjustments on the go.

Crafted from high-quality materials, the adapter guarantees durability and resistance to harsh conditions, catering to professionals who require reliable gear for outdoor adventures or tactical situations.
